

A (Senior)-Postdoc position is available in “Computational Materials Science/Heterogeneous Catalysis” in the Quantum Chemistry group at Humboldt University, Institute of Chemistry (www.chemie.hu-berlin.de/ag_sauer).

- regular temporary university position involving teaching (permanent position will become available within the next years in our group).
- participation in guiding PhD students and running externally funded projects
- development of scientific independence (“Habilitation”) is encouraged
- in-depth knowledge of major quantum codes for periodic structures is expected
- participation in method development is encouraged, but not a condition.
- solving electronic structure problems of complex oxides and their surfaces in heterogeneous catalysis
- excellent cooperation environment within SFB 546 (<http://www.chemie.hu-berlin.de/sfb546>) and UNICAT cluster of excellence (<http://unicat.tu-berlin.de>).
